BY CONGREGATIONAL SUNDAY SCHOOL. — A song, bearing the name and founded upon local and beautiful creation of Mrs. Stone, was performed in the schoolroom of the above on Tuesday evening. The narrative and the portion was read by the Rev. A. G. The illustrative music was rendered by the children and teachers of the under the able leadership of Mr. Sharp. The was crowded by an appreciative audience and their satisfaction by their contributions of the school, in behalf of which the ser-

WEEKLY LECTURE.—The Rev. William Fletcher, for many years a missionary in the South Sea, in connection with the Wesleyan Society, on Wednesday delivered a lecture in the Wesleyan Church, Cleveland street, in illustration of the difference, language, government, civil and religious of the Samoan, Rotuman, Fijian, and New Zealanders. There was a very good attendance, and the audience manifested the deepest interest in the subject of the lecture. On the motion of Mr. Haywood, seconded by Mr. Hayes, a cordial vote of thanks was accorded to Mr. Fletcher for his valuable and interesting lecture.

officially informed that the maning of the in-
by the Dunbar Canteen who was charged at
Police Court, on Saturday last, with
attempted to commit suicide was not
reported to the police, but a man named
the mistake has been an unfortunate one for
our Moslems, who, in his search for employment,
to bear the unjust suspicion of having made
on his own life.

at WOOTLAMMA.—On Tuesday morning last,
at dusk, the neighbourhood of Little Woot-
was disturbed by the report that a fire had
broken out in a house in that locality. One of the

OUR-STREET BALMAIN YOUNG MEN'S ASSOCIATION. — The above held its usual weekly meeting on Tuesday being the end of the first quarter, the retiring president, Mr. J. J. Watson, and the retiring treasurer, Mr. J. J. Watson, read their reports, which showed that the formation of the society it has been steadily going on, also that the funds are in a very healthy character.

THE PROMPTITUDE ACKNOWLEDGED.—In the inquest held on the 27th ultimo, on the body of Charles Hucker, found drowned at the Quays, it was qualifiedly mentioned that the deceased had been drowned, as he expressed their approbation of the promptitude displayed by water police constable John Brown Christian Union.—The first anniversary of the death of the late Young Men's Union was celebrated last evening by a tea in the Congregational schoolroom, at which

ables prevented by the severe dust-storms in about the time of gathering. After the sermon took place in the church, where the meeting was held, the Rev. Joan A. Dowd, of the church and president of the Union, occupied the chair. Mr. Chivers, the honorary secretary, reported a considerable amount of success in the endeavour of the organization to reach a good number of young men having joined the church, and become members of the literary and social classes; that the nucleus of a library had been formed; that the temperance society consisted of hundred members, and temperance meetings

COLLISION.—Shortly before 6 o'clock last night two drags came into collision at the corner of Sussex street, one of which was driven by a man named Thomas Murphy.

was driving down King-street, and Murphy arrived, who was sitting on his dry, half-burnt log of his late cargo, and the few of the colliers, who had taken home to his residence. The dry trees were not damaged. The coopers to have been purely accidental.

IN REGATTA.—The crew of gentleman: steamer Hobart Town, to row at the Balmes in the Intercolonial champion gig race for the Challenge Cup, will arrive per steamship this (Friday) forenoon. The members of the Hobart and Mersey Rowing Club, who are in rowing matters are requested to meet at their arrival at the Clifton Wharf. We

was requested to remind intending competitors rhyming regatta that the entrance will be by the committee this evening at Balmain. The committee have been fortunate in securing the kindness of Messrs. J. H. and J. W. and Captain Chevalier, the splendid steamboat as their flagship for 1847 regatta. She will be in similar position as the Whampoa last year at the Parramatta River, close to Longwood. Arrangements have been made for steamers in the foot of Erskine-street direct to the flag-pole on this day. The committee intend to have a large and exceedingly good prize to make the regatta successful, and yet trust their services

REWARDED BY FULL ENTRANCES FOR THE SEVERAL
the programme.

KEY CHALLENGE CUP MATCH.—The first of the
series of the season was commenced at the
ground last Saturday, and will be continued
on afternoon. The state of the game so far is
as follows:—Warrington, 79; Ayr, 64; and
68. Massive, of the Albert, who is not out,
five innings, and made twelve hits for four
h. four of them being consecutive.

SIGHTED PEOPLE.—The *Edie* of yesterday
Dr. Schwarzbach has entered upon a course of
ation which is of some importance and capable

erable development. The object of his recent mission was to ascertain the percentage of shortsighted which exists among the children of the Public Schools of London. He has found that 11 per cent. only of the pupils attending need suffer from short-sightedness. This is no factory, and we hope that the hints which he has now taken off of use in directing attention to the importance of making all precautions which tend to unnecessary injury to the optic nerves. He has pursued his scientific investigations in the circles he has been able to discover many causes of sight, and point out how it is that these certain things are not clear to the common

on, even at a short distance, and how it is that the eyes are Brown a considerable amount of the trouble to see him when he meets the stranger at a distance is probably 10 to 100. We imagine that if Dr. Bach could obtain permission to examine members of Parliament, he would discover some still more remarkable, and he might give some probable explanation of strange which can account for only on the supposition that political obliquity of vision largely prevails. As a specimen of his method, he has a number of notes from the eyes of the eyes, a number of beams from the eyes of the

and so enable members generally to
be in their true light at a considerable distance
instead of blinking at them at close quarters,
porting them by reason of defective vision,

sight", which affords their vision might be

J. MELLHAN'S CONCERT.—Mons. Mellhan gave a grand concert at the Masonic Hall, last night, in aid of the Indian Fairs and Relief Fund. The programme was a most interesting one, and we notice that the Municipal Council sent a site on the left-hand side of Moors

Signor Steffani, Herr Kretschmann, and all
 ble musical talent of Sydney. The pro-
 , which is exceedingly attractive, will probably
 nced to-morrow.

EAST MAITLAND ELECTION.

NEWCASTLE, THURSDAY.
Scholey has been returned for East

by a majority of two over Mr. Dodds. The has caused intense excitement. The numbers were—

Scholey	21
Dodds	19

After the declaration of the poll a large number of Mr. Dodds's supporters met at Graney's Hotel and subscribed a sum of money to protest against an election of Mr. Scholey, on account of alleged impersonations.

THE HAWKESBURY ELECTION.

[BY TELEGRAPH.]

WINDSOR, THURSDAY.

The following is the final state of the poll for the Hawkesbury:—

Bowman	40
Moses	38
Piddington	2
Primrose	1
Davis	1

The first two were declared duly elected.

ARGYLE ELECTION.

[BY TELEGRAPH.]

GOLDENBURY, THURSDAY.

The following is the state of the poll:—

	Daves.	He.
Goulburn	214	
Marsden	79	
Bungonia	44	
Collector	91	
Tamara	128	
Laggen	23	
Manmell	60	
Tamargo	63	
Tarlo	37	
Crookwell	108	
Bunda	18	
Breadalsbane	13	
Woodhouse	21	
	890	

Majority for Davies, 337.

There were 37 informal votes.

THE WINDSOR ELECTION.

[BY TELEGRAPH.]

WINDSOR, THURSDAY.

The election for Windsor took place to-day and the following result:—

	Driver.	Ca.
Richmond	157	
Richmond	199	
	327	

Majority for Mr. Driver, 201.

ELECTION FOR WEST MACQUARIE.

[BY TELEGRAPH.]

BATHURST, THURSDAY.

ton	Finney
	Rae

Mr. Fisher was declared duly elected.

YASS ELECTION.
[BY TELEGRAPH.]

YASS, WAGBOW.

The following is the state of the poll. The returns are complete.

	Fitzpatrick.	Perry.	Reagan.

which has been exhibited to a wonderful degree on several occasions, and as the processionists were returning home by the train last evening started by made upon them. A mob assembled at the bridge, and half prevented the progress of the Orange train, and half prevented the progress of the police, but did not disperse until the train was called out. There was an encounter between the porters and the police, in which one man was shot and several injured. The speaker stated that the city is now quiet.

AN EDUCATION TOUR.—Some time since it was announced that a tour had been formed in France for the purpose of organizing an anti-slavery movement in that country, and that the tour would visit the world, partly for the purposes of exploration, and partly for the education and enjoyment of those who were to go. We have not heard of the proposed expedition.

know what stage it has reached. Meanwhile a party of men, who had been organized for the purpose, had reached the other side of the water, and had been organized for the purpose, had reached a stage that it is confidently anticipated that the expedition will start on the 1st of October. The expedition has received the encouragement of some of the national authorities, and is supported by some of the most eminent scientific men in the United States. The men like Professors Asa Gray, Noah Porter, J. S. Allen, A. E. Verrill, J. S. Newberry, and Joseph Henry. The director, and apparently, organizer of this expedition, is Mr. James O. Woodworth.

strongly commanded by the Academy, by the Secretary of the State of Indianapolis, the purpose of the expedition is to visit points of great scientific interest on the frontiers of the state, study the arts, archaeology, and preserve the better known countries, and the geology, zoology, flora, and fauna, as well as the history and the manners of the various tribes, and make collections in the various departments of science. To this end the expedition will be about two years in the field. The participants will afford opportunities for seeing the great natural and historical objects of the country, and at the same time will be able to make collections in the various departments of science. To this end the expedition will be about two years in the field. The participants will afford opportunities for seeing the great natural and historical objects of the country, and at the same time will be able to make collections in the various departments of science. To this end the expedition will be about two years in the field. The participants will afford opportunities for seeing the great natural and historical objects of the country, and at the same time will be able to make collections in the various departments of science.

biology, and the principal approach is through the Biological Sciences Program in Cornell University. The expedition is thus mainly intended for students, and we believe arrangements have been made for taking a limited number of students on the trip. Several of the professors are to take their wives and children, and, according to the latest statement, a number of them are being asked for taking a limited number of lady students. The Cornell University ship, 1492 tons burden, has been engaged to carry the novel and delicately-assorted expedition and will be equipped in a thoroughly complete manner, with all sorts of appliances, apparatus, library, etc., suitable to the nature of the expedition. The cost of the expedition is \$250,000, and it is calculated that the expedition will yield a return of \$100,000. Faculty, officers, students, cadets, and

[illegible]

and Plymouth. Here the vessel will remain all the rest of October, 1879, giving time for extended excursions; then home by the *Arizona*. There will, of course, be extended inland excursions and subsidiary journeys by sea, and care will be taken to make extensive collections of all kinds. Such is the ambitious programme of this characteristic American expedition. It looks attractive on paper, and if carried out faithfully cannot but afford great pleasure and instruction to all its members; but to do this will require the nicest tact and the highest administrative power.—*Texas*.

A FISH FARM.—A few hints may be gathered from the following description of a fish-breeding establishment, which is situated on the banks of the River Great Ouse, near the tow-barks of the Thames, within a few miles of the throw of Chertsey bridge, a fish-breeding establishment, which was started some few years ago by a gentleman, who has since been joined by a partner, and approved upon until it has now become one of the most complete establishments of the kind in the kingdom. The proprietor has been enabled to do this in a little before the public, notwithstanding the fact that the main object of the proprietor has been to benefit the public generally by improving the fish at disposal, and not to make a fortune. The establishment is situated in this respect may be surmised from the fact that it was within the last few years some tens of thousands of fish were sent to the market, and the proprietor has turned into the Thames at various places. Mr. Forbes, the originator and proprietor has displayed great ingenuity in the construction of his fish-breeding establishment. He has been enabled to construct machinery for aerating the water is worked by water itself. This is accomplished by directing the water from a high level into a series of small bellows. This fills and empties itself every few minutes, the action each setting the machinery in motion, thus creating a rough and ready aeration of the water. In other matters of detail, the same economy of expense and labour has been carefully studied, and though Mr. Forbes has been perfecting his plans for regulating a proper supply of water, he has now succeeded in being able to carry out the operation of aerating the water in a comparatively trifling expense. The water supply is derived from a well, from which some 60

[illegible][illegible]

which has been exhibited in a wonderful degree on several occasions, and as the processions were returning home by the train last evening started a mob of 100 persons, who were armed with sticks and stones, and for an hour or more they were engaged in the Orange train. They were repeated in the progress of the police, but did not disperse until the military were called out. There was an encounter between the porters and the police, in which the latter were stabbed. The last reports state that the city is in a state of excitement.

AN EDUCATIONAL TOUR.—Some time since it was announced that a society had been formed in France for the purpose of organizing an expedition round the world, partly for the purpose of collecting specimens, mainly for the education and enjoyment of those who could not afford to go to the various countries proposed to be visited.

AN EDUCATIONAL TOUR.—Seven times since it was announced that a society had been organized in France for the purpose of organizing an expedition to the North Pole, the party for the purpose of exploration, to study the education and enjoyment of those who would take the expedition. We have not heard of the proposed expedition.

know what stage it has reached. Meanwhile a party of men, who had been organized for the purpose, had reached the other side of the water, and had been organized for the purpose, had reached a stage that it is confidently anticipated that the expedition will start on the 1st of October. The expedition has received the encouragement of some of the national authorities, and is supported by some of the most eminent scientific men in the United States. The men like Professors Asa Gray, Noah Porter, J. S. Allen, A. E. Verrill, J. S. Newberry, and Joseph Henry. The director, and apparently, organizer of this expedition, is Mr. James O. Woodworth.

Longly commended by the Governor to the Secretary of the State of Indian Affairs, the purpose of the expedition is to visit points of general and special interest on a route around the globe, to study the arts, archaeology, and present conditions of the better known countries, and present conditions of the geography, fauna, and flora, as well as the history and character of the people of those less known, and make collections in the various departments of science. To this end the expedition will be about two years in duration, and is believed by its organizers, will afford opportunities for the greater part of the world in many new and interesting ways.

that would be possible in an expedition organized on a smaller scale or by individual enterprise. A more closely followed as soon as practicable after the vessel leaves New York. It will consist chiefly of lectures on all subjects that can be studied to advantage in an expedition of this character. For this purpose a large staff of professors, who are entitled to "Faculty," have been engaged, who will direct the studies both in the lecture-room and on the wide sea presented by the voyage. These professors belong

in departments of science, the principal appointments are: Dr. Bart G. Wilder, Professor of Anatomy and Zoology, and Dr. J. H. Henshaw, Professor of Chemistry, both at the University of California. The expedition was thus mainly intended for scientific and educational arrangements have been made for the accommodation of a number of Naval Cadets at half the ordinary rate. Several of the professors are taking the voyage for recreation and laughter, and, according to the latest statement, the arrangements are being made for taking a larger number of lady students. The City of Merida, steamship, 1492 tons burden, has been engaged to carry the novel and delicately-assorted expedition and the officers all belong to the United States Navy.

will be equipped in a thoroughly handsome complete manner, with all sorts of appliances apparatus, library, &c., suitable to the nature of the expedition. The fare for the trip is \$6000 dollars, it is calculated that the expedition will consist of six or eight persons—Faculty, officers, students, cadets, &c. The outfit will be required to wear a uniform. The route of the march will be by way of Rio de Janeiro, the March of the Amazon (Thomas and Barbosa), the march from Manaus to Rio Janeiro, then to Montevideo, through the Straits of Magellan, where some time will be spent, to Valparaiso. Leaving this place in February, 1879, coverage will be continued to the Society and News.

tor's Islands, the Fiji, and Australia, all of which may yet be made; then by the Solomon and Caroline Islands to Formosa; and thence to Japan, in Japan, several parts of which will be visited; Next the mouth of the Peiho River, in China, will be made; and next Shanghai, and up the Yang-tsekiang to Nankin. Hongkong, Whampoa, and Canton will be visited; thence to Manila, the islands of Zebu, Samar, Leyte, Mindanao, Macassar, Celebes, Formosa, and other islands, on to Singapore; thence to Australia, when several parts of India will be visited; Java, the Laccadives, perhaps up the Persian Gulf to Shattum, and then to the Red Sea, and the Gulf of Aden.

The expedition is planned to include a visit to Morocco, and through the Strait of Gibraltar, to the Holy Land, and the voyage will be continued by Greece, Italy, touching at various points, Malice, Malaga, Gibraltar, Cadiz, Lisbon, Chios, and Plymouth. Here the vessel will remain all the first of October, 1879, giving time for extended excursions; then home by the Azores. There will, at various points, be extended inland excursions and subsidiary journeys by sea, and care will be taken to make extensive collections of all kinds. Such is the ambitious programme of this characteristic

A FINE FARM—A fine home may be gathered in the following description of a fish breeding establishment in London, which we extract from *The Times*: "Gloze by the banks of the Thames, within a stone's throw of Chertsey bridge, a fish-breeding establishment, which was started some few years ago by a sportsman gentleman, has year by year been enlarged

improved until it has now become one of the most complete establishments of the kind in this country. In doing, being a private one, it has written before the public, and *the fact* is, the main object of the proprietor has been to benefit the public generally by improving the fish of our metropolitan rivers. That it is likely he has succeeded in this respect may be surmised from the fact that within the last few years some tens of thousands of fish have been hatched in the troughs at Chertsey, and turned into the Thames at various places. Mr. Forster, the originator and proprietor, has displayed great ingenuity in the construction of his fish-breeding

ing house. By a simple but clever device the machinery for aerating the water is worked by water itself. This is accomplished by directing the waste flow into a receptacle somewhat the shape of a bellows. This fills and empties itself every few minutes, the action each time setting the machinery in motion, thus securing a thorough and constant aeration of the water. Other details of detail same economy of expense and labour has been carefully studied, and though Mr. Forbes has been at great expense in building his fish-house and perfecting his plans for regulating a proper supply of water, he has now succeeded in being able to carry

his operations under the most favourable conditions and at a comparatively trifling expense. The water supply is derived from a well, from which some 50 gallons are daily pumped into a receptacle or reservoir placed at the top of the fish-house. Flowing through the tanks day and night, the water drains of the open-air tanks, situated in the garden (where are deposited a number of full-grown fish of various descriptions), and eventually empties into the Thames. At present of course there is no fish being going on. The tanks are however, filled with the splendid fish of various ages, and descriptions, the most beautiful and valuable for the purpose.

[illegible]

ishment, it is only due to him to say that the fish were taken at his own expense, without any pecuniary assistance. The thousands of fish which are each year taken from his lands and thrown into the river are as a free gift with the commendable view of benefiting Thames anglers generally by securing a more abundant stock of fish. This good work, it will be recollected, was formerly carried on by the Thames Angling Preservation Society under the direction of Mr. Frank Buckland and Mr. Stephen Ponder. A few years since these gentlemen worked energetically and successfully in rearing a fine stock of fish at Sunbury Ponds, kindly given to the Thames Club

servancy Board to the society, and turning it into the river. The special fund which was collected formerly each year by the Thames Angling and Fishing Society for this object was stopped some years ago, since which 'time the artificial stocks of fish, such as salmon and trout, have been left almost altogether to the good will of the private gentleman, whose disinterested exertions will, it is hoped, be duly appreciated by all Thames anglers. It is expected that when the new Natural History Museum is opened at South Kensington the authorities will be enabled to give greater facilities to Mr. Frank Buckland in carrying on his fish-breeding experiments. The

commodation at present at his command is extremely limited and far below what it ought to be for the investigations necessary for the study of the economic working of our fisheries.

[illegible]

WANTED, by two gentlemen
for. partial board, in a private

For plans, estimates, &c., Ladies O. D. Post Office.

WANTED, in a respectable locality, central, a house with a garden, for a gentleman's private habitation. The establishment has a large family, but the house is not wanted for the business. The lowest price for a cash advance will be accepted. Write to J. G. Wilson, Robinson's Lane, Birmingham.

WANTED, comfortable BEDROOM, Burn, &c., near the railway, situated with a garden, and a bathroom frequently about travelling. Kindly address all particulars, Traveler, H. & O. Office.

TO LET.

A LARGE ROOM TO LET, furnished, 320, Main, quietest part South.

A SMALL HOUSE TO LET, 141, Rhye-street, West, 100 yds.

A VERY LARGE furnished comfortable Cottage to LET, 25, Adelaide-terrace, 140, 450, & 600, &c., &c.

A LIBERTY STREET Woodlawn, No. 3, Family Residence, well furnished and dining rooms, folding doors, device of fireplace, kitchen, with a large range, bathroom, (bath and shower), verandah and balcony with splendid harbor view, gas, water use of paddocks, and garden, and every convenience.

A PALMIA, EAST-TO LET, Robinson's Lane.

B COTTAGE, 7 rooms, every convenience, low rent, a beautiful harbour view. J. G. Wilson, Robinson's Lane, Dunsin.

BATHURS.—To LET (for sale) on the best terms; formerly occupied, or contemplated, a gentleman's residence, 10 plots with roof-top, containing in all eight acres of land, with a large garden, and a small field laid out and planted with ornamental shrubs, spruces, and vine and fig. For particulars and plans, apply to Bart. & Co., 10, 11, & 12, Exchange-street, Birmingham.

CENTRAL, Post's Hotel, is now open to Supper.

DARLINGTON.—To LET, a superior furnished house, 40 yds. Ap's & E. Railway, 412, George and Kings-land-street, Birmingham.

FURNISHED and dry ROOM moderate. 337, Macquarie-st.

[illegible]

TH HOTEL, together with all
and all fixtures and fittings; and
in good and sound condition, on A.

TO LET, corners of King and Elizabeth streets, YARD, with small Cottage (suitable for carpenter or builder), now in the occupation of Cool, Brothers, Auctioneers. Apply to J. L. Ewing, 101, Queen-street East.

TO LET a Warehouse, in excellent business WAREHOUSE, N. S. W. & Co. & Co. buildings, Edward-street, near to Queen-street, at present in the occupation of Messrs. Ewing and Co. Apply to Alfred Davidson, near Queen-street, Brisbane.

A COMFORTABLY furnished OFFICE to LET: near Lewis-street, George-street.

FURNISHED OFFICES to LET, in Pitt-street, near George-street, for one or two persons.

GEORGE and WYNWARD STREETS.—
OFFICES to LET in first and second stories, over the Mutual Life Association of Australia. Apply to the Secretaries.

OFFICES to LET, Rane-chauk, E. R. Cole, George and Rane streets.

OFFICE to LET over E. Millard's, 209, George-street.

OFFICES.—Required, in the vicinity of the Surveyor-General's Office, ROOMS, suitable for offices; must be spacious and well lighted. Apply to John P. Lander, 111, Pitt-street. Surveyor-General's Office, Sydney, 21st October.
